

# Password Reset for Domain joined computers

## Password Reset for Domain joined computers

Password Reset for Domain joined computers

1. If you are in the office skip the next step and begin at step 3
2. Connect to VPN as you normally would for remote work. In the bottom right, next to the date and time should be a internet connection symbol. If you click on that it should give an option for VPN connections and you can select the VPN there.

3. Press Ctrl+Alt+Del and select Change password

4. Update your password
