

Password Reset for Domain joined computers

Password Reset for Domain joined computers

Password Reset for Domain joined computers

1. If you are in the office skip the next step and begin at step 3
2. Connect to VPN as you normally would for remote work. In the bottom right, next to the date and time should be a internet connection symbol. If you click on that it should give an option for VPN connections and you can select the VPN there.

3. Press Ctrl+Alt+Del and select Change password

4. Update your password
